COMMODITY TRADE BY INDUSTRIAL SECTOR

Historical Summary 1966-1981

Attached is a review of Canada's external trade in commodities classified by the principal industrial sectors for the years 1966-1981. The tabulations show total exports (including re-exports), total imports and re-exports, and net exports.

Canada's merchandise trade statistics are officially recorded and tabulated by Statistics Canada following a system of commodity classification. In this review, these commodities have been allocated to the most appropriate industrial group. The reports on the industrial sector which have produced or manufactured these commodities in Canada, and the imports of these commodities in Canada which could be used as inputs for manufacturing these commodities in Canada.

COMMODITY TRADE BY INDUSTRIAL SECTOR

HISTORICAL SUMMARY 1966-1981

It should be noted that the data for the years 1966-1981 included in this report are based on the latest available data. These data should not be used for the purpose of trade. The latter is only strictly appropriate as a reference.

This report, produced from Statistics Canada's data, supplements the previous "Commodity Trade by Industrial Sector: Historical Summary, 1966-1981" issued by the Economic Intelligence Directorate, Department of Industry, Trade and Commerce in July 1981.

COMMODITY TRADE BY INDUSTRIAL SECTOR

Historical Summary 1966-1981

Attached is a review of Canada's external merchandise trade classified by the principal industrial sectors for the years 1966-1981. The tabulations show total exports (including re-exports), total imports and re-exports customs value basis.

Canada's merchandise trade statistics are officially recorded and tabulated by Statistics Canada following a system of commodity classification. In this report, these commodity data have been allocated to the most nearly appropriate industry groups, i.e., exports to the industries which have produced or manufactured these commodities in Canada, and the imports to those industries in Canada which could or would produce or manufacture these commodities in Canada.

The revised 1970 Standard Industrial Classification issued by Statistics Canada in December 1970 is the framework used. Particular commodity groups within industries are also shown at various points in the tabulation.

It should be emphasized that although re-exports are included in the data for total exports on a customs value basis, these data should not be used to calculate the balance of trade. The latter is only strictly appropriate on a balance of payments basis.

This report, produced from Statistics Canada latest records, supercedes the previous "Commodity Trade by Industrial Sector, Historical Summary, 1966-1980" issued by the Economic Intelligence Branch, Economic Policy and Analysis, Department of Industry, Trade and Commerce in July 1981.

COMMODITY TRADE BY INDUSTRIAL SECTOR

Historical Summary 1966-1983

Attached is a review of Canada's external merchandise trade classified by the principal industrial sectors for the years 1966-1983. The tabulations show total exports (including re-exports), total imports, and re-exports all on a customs value basis.

Canada's merchandise trade statistics are officially recorded and tabulated by Statistics Canada following a system of commodity classification. In this report, these commodity data have been allocated to the most nearly appropriate industry groups, i.e., exports to the industries which have produced or manufactured these commodities in Canada, and the imports to those industries in Canada which could or would produce or manufacture these commodities in Canada.

The revised 1970 Standard Industrial Classification issued by Statistics Canada in December 1970 is the framework used. Particular commodity groups within industries are also shown at various points in the tabulation.

It should be emphasized that although re-exports are included in the data for total exports on a customs value basis, these data should not be used to calculate the balance of trade. The latter is only strictly appropriate on a balance of payments basis.

This report, produced from Statistics Canada latest records, supercedes the previous "Commodity Trade by Industrial Sector, Historical Summary, 1966-1982" issued by the Statistical and Data Base Services Directorate, of the then Regional and Industrial Policy and Small Business, Department of Industry, Trade and Commerce/Regional Economic Expansion in August, 1983.

COMMODITY TRADE BY INDUSTRIAL SECTOR

Historical Summary 1966-1984

Attached is a review of Canada's external merchandise trade classified by the principal industrial sectors for the years 1966-1984. The tabulations show total exports (including re-exports), total imports, and re-exports all on a customs value basis.

Canada's merchandise trade statistics are officially recorded and tabulated by Statistics Canada following a system of commodity classification. In this report, these commodity data have been allocated to the most nearly appropriate industry groups, i.e. exports to the industries which have produced or manufactured these commodities in Canada, and the imports to those industries which could or would produce or manufacture these commodities in Canada.

The revised 1970 Standard Industrial Classification issued by Statistics Canada in December 1970 is the framework used. Particular commodity groups within industries are also shown at various points in the tabulation.

It should be emphasized that, although re-exports are included in the data for total exports on a customs value basis, these data should not be used to calculate the balance of trade. The latter is only strictly appropriate on a balance of payments basis.

This report, produced from Statistics Canada latest records, supercedes the previous "Commodity Trade by Industrial Sector, Historical Summary, 1966-1983" issued by the Statistical and Data Base Services Directorate, Department of Regional Industrial Expansion, in the Fall of 1984.

COMMODITY TRADE BY INDUSTRIAL SECTOR

Historical Summary 1966-1985

Attached is a review of Canada's external merchandise trade classified by the principal industrial sectors for the years 1966-1985. The tabulations show total exports (including re-exports), total imports, and re-exports all on a customs value basis.

Canada's merchandise trade statistics are officially recorded and tabulated by Statistics Canada following a system of commodity classification. In this report, these commodity data have been allocated to the most nearly appropriate industry groups, i.e. exports to the industries which have produced or manufactured these commodities in Canada, and the imports to those industries which could or would produce or manufacture these commodities in Canada.

It should be emphasized that, although re-exports are included in the data for total exports on a customs value basis, these data should not be used to calculate the balance of trade. The latter is only strictly appropriate on a balance of payments basis.

This report, produced from Statistics Canada latest records, supercedes the previous "Commodity Trade by Industrial Sector, Historical Summary, 1966-1984" issued by the Statistical and Data Base Services Directorate, Department of Regional Industrial Expansion, in the Summer of 1985.

For the 1985 update presented here the sectoral trade statistics have been rebased to the 1980 Standard Industrial Classification (SIC) as issued by Statistics Canada in December 1980. Since the 1980 SIC's already provide somewhat greater detail, we have adhered more to the formal classifications than was the case with our previous 1970 SIC based reports. In a few cases however, we have again created special SIC definitions to better utilize the detail provided by the commodity trade classifications. The descriptions of the additional sectors we have introduced are prefixed by an "*" in the tables.

It should also be noted that in our review of the commodity allocations for the establishment of the concordance with the 1980 SIC's, changes were made which in a few cases cause a significant shift in the value of trade between sectors (when compared to the previous 1970 SIC based tables). In the tables presented here, the changes to the commodity allocations have been applied on a consistent basis back to 1966. Users should note that in light of rising printing costs, in the future we will only be publishing the trade statistics for the most recent five-year period. The current reports should therefore be retained for the historical series.

NOTE TO USERS

Since there has been a delay in Statistics Canada's release of the 1985 estimates for domestic shipments, we have not updated the Manufacturing Trade and Measures Report at this time. When the necessary data is available we hope to update this report and make it available for distribution. Since this report will also have to be revised for the 1980 SIC definitions, we will only be able to produce the trade and measures tables for the 1981-1985 period. Statistics Canada will only be able to rebase their estimates of shipments on an 1980 SIC basis back to 1981, and commencing with the 1985 estimates are now only reporting on that basis. Users would be advised to retain their previous (1985 edition) copy of this report for the historic series.
